### Tom Mitchell's Home Page

The subsurface ground consists of a top silty sand layer which extends from the natural ground surface to a maximum depth of 5-m. This layer is underlain by weak sandstone and very dense sand with cemented bands and lumps which extend to the end of drilling, located 40 m below the natural ground surface.

### Twitpic

Excavation methods are the various techniques used within archaeology to dig, uncover, identify, process, and record archaeological remains. Archeological excavation involves the removal of soil, sediment, or rock that covers artifacts or other evidence of human activity. Early excavation techniques ...

### Higher Education | Pearson

Earth science or geoscience includes all fields of natural science related to the planet Earth. This is a branch of science dealing with the physical constitution of the Earth and its atmosphere. Earth science is the study of our planet's physical characteristics, from earthquakes to raindrops, and floods to fossils.

### Northwestern University Campus Maps

What is Science On a Sphere®?. Science On a Sphere® (SOS) is a room sized, global display system that uses computers and video projectors to display planetary data onto a six foot diameter sphere, analogous to a giant animated globe. Researchers at NOAA developed Science On a Sphere® as an educational tool to help illustrate Earth System science to people of all ages.

The concentration of carbon dioxide (CO<sub>2</sub>) in the atmosphere has increased from approximately 277 parts per million (ppm) in 1750 (Joos and Spahni, 2008), the beginning of the industrial era, to 405.0±0.1 ppm in 2017 (Dlugokencky and Tans, 2018; Fig. 1). The atmospheric CO<sub>2</sub> increase above pre-industrial levels was, initially, primarily caused by the release of carbon to the atmosphere from ...

### Science Flashcards

**Global Warming Introduction.** Global warming is a long-term increase in Earth's average surface temperature. Because global warming does not cause uniform warming in all locations and because many other changes in climate are occurring, scientists often prefer to speak of “global climate change” rather than of global warming when referring to the whole complex of changes being caused by ...
