A flood basalt (or plateau basalt) is the result of a giant volcanic eruption or series of eruptions that covers large stretches of land or the ocean floor with basalt lava.Many flood basalts have been attributed to the onset of a hotspot reaching the surface of the earth via a mantle plume. Provinces such as the Deccan Traps of India are often called traps, after the Swedish word ...

The Ring of Fire (also known as the Pacific Ring of Fire, the Rim of Fire, the Girdle of Fire or the Circum-Pacific belt) is a region around much of the rim of the Pacific Ocean where many volcanic eruptions and earthquakes occur. The Ring of Fire is a horseshoe-shaped belt about 40,000 (mi) long and up to about 500 km (310 mi) wide.. The Ring of Fire includes the Pacific coasts of ...

Noachian - Wikipedia
The history of Earth concerns the development of planet Earth from its formation to the present day. Nearly all branches of natural science have contributed to understanding of the main events of Earth's past, characterized by constant geological change and biological evolution. The geologic time scale (GTS), as defined by international convention, depicts the large spans of time from the ...

Ring of Fire - Wikipedia
The Noachian is a geologic system and early time period on the planet Mars characterized by high rates of meteorite and asteroid impacts and the possible presence of abundant surface water. The absolute age of the Noachian period is uncertain but probably corresponds to the Late Heavy Bombardment or to Early Imbrian periods of 4100 to 3700 million years ago, during the interval known as the Late ...

Earth science - Wikipedia
An ebook (short for electronic book), also known as an e-book or eBook, is a book publication made available in digital form, consisting of text, images, or both, readable on the flat-panel display of computers or other electronic devices. Although sometimes defined as "an electronic printed book", some e-books exist without a printed equivalent.

It is widely accepted that Mars had abundant water very early in its history, but all large areas of liquid water have since disappeared. A fraction of this water is retained on modern Mars as both ice and locked into the structure of abundant water-rich materials, including clay minerals and sulfates. Studies of hydrogen isotopic ratios indicate that asteroids and comets ...
