Once you've determined what is causing a problem, it's time to brainstorm possible solutions. Sometimes this involves teamwork, since two (or more) minds are often better than one. It's rare that a single strategy is the obvious route to solving a complex problem; devising a set of alternatives helps you cover your bases and reduces your risk of exposure should the first strategy you implement fail.

Complex Numbers: Problems with Solutions

Simple solutions to complex problems fail because a complex problem demands you start by admitting that complexity exists. The best way to tackle a complex problem is not to break it down into smaller, more easily managed pieces.
