1700s. Nicole-Reine Etable de la Brière Lepaute was one of a team of human computers who worked with Alexis-Claude Clairaut and Joseph-Jérôme Le Français de Lalande to predict the date of the return of Halley's Comet. They began work on the calculations in 1757, working throughout the day and sometimes during mealtimes. Their methods were followed by successive human computers.

In addition, many compliance processes are highly manual or supported by outdated tools. All this means that there is ample scope to optimize compliance processes. The best method involves streamlining these processes from beginning to end across functions as a first step, and only then looking at opportunities for automation and digitization.

Herstein's: Topics in Algebra is harder than Birkhoff and MacLane's book, but Birkhoff and MacLane's book is good for learning the fundamentals. As an undergraduate I used Herstein, but I think it is too difficult to self study from. It is critical to learn the definitions and other fundamentals cold and then go on to a more advanced treatment.

Proofs And Fundamentals Solutions Manual for proofs (or disproofs) of statements. Much of the learning in a course such as this comes from the struggle to produce a proof, rather than studying the techniques used by someone else to give a proof. Hence, providing a solutions manual would negate a necessary aspect of the course. In addition,
