PROTON MODEL 222 CAR STEREO POWER AMPLIFIER: PROTON ...  
Proton's DPD system was first used in the 40-watt D540 amplifier, and in the D1200 it is responsible for some of the highest power outputs we have measured from any amplifier. The DPD circuit is designed to allow an amplifier to deliver many times its rated steady-state power for short time intervals.

Proton D540 Integrated Amplifier Review price specs - Hi ...  
The Proton is also more versatile than any other receiver of its day. The Proton is very similar to NAD in build and quality and the sound of this amp after 10 years still beats the sound coming from most modern mid-fi receivers. It puts to shame anything from the likes of Yamaha up to \$1000 (as far up as I cared to go).

Free Proton Repair Service Manuals  
The Proton D540 has a ratio of 6 dB between its peak and its continuous maximum power levels, but the average power required, even for loud listening, is probably no more than a couple of watts. That gives the amplifier another 13 dB of dynamic range, for a total useful dynamic range of more than 20 dB.
