QUAL2K MODEL REPORT

The QUAL2K model for river and stream water quality was used to simulate the effects of a range of water quality improvement scenarios in the Hongqi River, which is a polluted tributary in the Taihu Lake Basin. These scenarios consisted of a series of three water treatment technologies in different configurations, from upstream to downstream.

November 25, 2003 1 INTRODUCTION
QUAL2K (or Q2K) is a river and stream water quality model that is intended to represent a modernized version of the QUAL2E (or Q2E) model (Brown and Barnwell 1987). QUAL2Kw includes some processes and options that are not in QUAL2K. QUAL2Kw is similar to QUAL2E in the following respects.
