### Ration Lab Chemistry Answers

Introduction: Denaturation of proteins involves the disruption and possible destruction of both the secondary and tertiary structures. Since denaturation reactions are not strong enough to break the peptide bonds, the primary structure (sequence of amino acids) remains the same after a denaturation process.

### Lab Report Titration - Michelle Tjia's Digiport

- a. Light elements are stable if their ration of protons to neutrons is 2:1. b. Nuclear with 36 or more protons are unstable. c. Isotopes with even number of protons and neutrons are more stable than those with odd numbers or protons and neutrons. d. All isotopes with more protons than neutrons are stable. e.
