- remove bottom rad hose and drain coolant -
remove t/stat and drain coolant. t/stat is on
the engine-end of the top rad hose. the
housing's held on by 3 bolts and you'll need
a new rubber seal for the stat when you put
it back in - flush through the rad and the
t/stat housing with a hose until both are
running clear - *

Renault Express - Wikipedia

Always bleed air from cooling system after replacing coolant. Set heater for maximum heat. Remove radiator cap. Loosen drain plug and remove drain bolt (if equipped) from engine block. Drain coolant reservoir. Fill coolant reservoir to MAX mark with 50/50 water-coolant mixture. Loosen bleed bolt and fill radiator up to base of filler neck. Close bleed bolt when coolant flows out without bubbles. Tighten bleed bolt.

Renault Express Engine Coolant System

Plainly, this system is what keeps your vehicle from melting down. Your RENAULT is one of the major components of this system. Made up of flattened tubes with fins, the RENAULT assists in transferring heat from the fluid passing into the from the engine into an air stream which is then carried away from the vehicle. The RENAULT is an efficient cooling device.
