Formatively Assess The Understanding Of Fractions

Simplify improper fractions into mixed or whole numbers. Some fractions can simply be divided into a whole number, while others will not divide evenly. Numbers that don't divide evenly must be rewritten as a mixed number. To simplify an improper fraction, first divide the numerator by the denominator. For example, for the fraction $10 / 3$, divide 10 by 3.

Reteaching Fractions For Understanding

When I learned about fractions as a student, I know mixed numbers and “improper” fractions were introduced as new, separate concepts from fractions. In fact, they are all numbers. I once asked a student, Parker, to complete a task that asked him to place the number 1 on a number line that showed two numbers, 0 and $5/3$ (video available here).
