has been one of the unexpected side-effects of the development of mirrorless camera systems. Ricoh has responded to this trend by introducing the Mount A12 module for its GXR system. This module, featuring a Leica-style M mount, allows the fitting of a wide range of lenses onto a GXR body for the first time.

Ricoh GXR Leica M Mount A12 Review | ePHOTOzine
Close focusing with the Ricoh GXR is not limited to the 50mm macro lens. The 28mm lens also focuses down to half life size (albeit with a wider FOV), and both zooms can focus down to 1cm at the wide-angle end of the zoom range, which enables you to capture dramatic close-ups regardless of which lens you have

Snap Focus Few, ready for it? Ricoh GRD (And GXR and GX100-GX200) have a feature called snap focus. the idea is simple: On snap focus the camera focuses on a specified distance: 1m,1.5m, etc. That's it. What is the fuss about? Well the simple fact that the GRD is a small sensor camera with a fast lens.
