This article investigates the trajectory of a translator's agency power and the driving force behind it. Taking one famous Chinese translator—Zhang Guruo as the case in point, the paper reveals that the translation process of the translator actually witnesses the empowerment of the translator, and that the trajectory of the translator's agency can be carved in his changing power positions in ...

The dissolved gases normally present in water cause many corrosion problems. For instance, oxygen in water produces pitting that is particularly severe because of its localized nature. Carbon dioxide corrosion is frequently encountered in condensate systems and less commonly in water distribution systems. Water containing ammonia, particularly ...
