to properly define the term "switch", you need to think about bridging, a network bridge connects two network segments together to make them one, same broadcast domain, same ARP tables, same default gateway, same DHCP table, etc. a switch is a ...

CCNA Exam Topics - The Cisco Learning Network

Routing is the process of selecting a path for traffic in a network or between or across multiple networks. Broadly, routing is performed in many types of networks, including circuit-switched networks, such as the public switched telephone network (PSTN), and computer networks, such as the Internet. In packet switching networks, routing is the higher-level decision making that directs network traffic.
