the fuel injection computer or the ignition control when the cylinders are firing. This causes the ignition coil to provide a spark and the injector to inject fuel into each cylinder at the right time. If either sensor isn't working correctly, the car will run rough and the engine will be less efficient.

Rover K-series engine - Wikipedia

The Rover 400 Series, and later the Rover 45, are a series of small family cars that were produced by the British manufacturer Rover from 1990 to 2005. The car was co-developed as part of Rover's collaboration with Honda. The first generation 400 was based on the Honda Concerto, and the Mark II 400 (later the Rover 45) was based on the Honda Domani/Civic.
