things go right. Safety-II views the human not as a hazard, but as a resource necessary for system flexibility and resilience.

SCM Safety Blog: Every Blunt End Is
Someone Else's Sharp End

The Institute of Medicine (IOM) stated that safety was dependent upon health care systems and organizations, and patients should be safe from injury caused by interactions within systems and organizations of care. 6 Organizational factors have been considered the "blunt end" and represent the majority of errors; clinicians are considered the "sharp end." Therefore, to prevent errors, the organizations in which humans work need to be adapted to their cognitive strengths and weaknesses ...
