I have a Sansui B-3000 amplifier. And I blew it for the second time in a few hours. I was not even playing loud. The first time an IC gave up, the second time I blew many parts because a small resistor broke down (so told a HiFi shop) It could have been bad luck but the cause of the problem may be found in the resistance of my Canton speakers.

### Sansui B-3000 Manuals

Hi There. New to HIFI and have a question about a Sansui B-3000 amp. Just wondering if the cooling fan runs all the time or when it reaches a certain temp. The one I just bought doesn't seem to be turning on even after I played with the volume up half way with a lot of hard bass. The temp on the cooling fins reached about 150 degrees.

Its interesting to me that Sansui designed the CA-F1 in such a slim, rack mount enclosure. I dont recall, but did I send you the '80 review I have of the BA& CA-F1 from 'Audio' mag? I think I did, but after a while its hard to remember. I actually do have a C-1000, along with the matching B-3000 amp, and T-1000 tuner.
