Sony In-Dash Digital Media Receiver Built-in Bluetooth ...
A satellite navigation or satnav system is a system that uses satellites to provide autonomous geo-spatial positioning. It allows small electronic receivers to determine their location (longitude, latitude, and altitude/elevation) to high precision (within a few centimeters to metres) using time signals transmitted along a line of sight by radio from satellites.

DISH | Satellite TV | Plans | Winegard Company
There are 3 ways to update: 1.) if you are already a Dish customer take the receiver inside and hook it up to your home satellite wiring. The receiver will update at 1 AM or so automatically. 2.) Clear the memory by unplugging the receiver, disconnect the coax to the dish and plug the receiver back in to reboot through the whole process.
