Tutorial: How to use the guide number of your flash - Tangents
The Guide Number (GN) is as much about the reflector coverage angle as about the power level.. If the GN of one flash is specified as GN 180, but its narrow zoom coverage angle is concentrating all the power to only illuminate a small bright spot on the wall, and another flash specifies GN 90, but its wide reflector is illuminating the entire room, then we don't know much about the difference.

Nikon SB-900 4. Nikon SB-910. Can you add the guide number info to the article? Can you add the units of measurement to the article? Reply. 11 Neil vN says. March 9, 2012 at 12:27 am. This covered in the final part of this article:

Nikon Sb 900 Guide Number - wondervoicapp.com equals the filter's rated loss in f-stops. The following is a step-by-step example of using the above formula: Suppose your guide number is 32 (it is irrelevant if it is scaled for meters or feet for this purpose) and the rated filter loss is 1.5 f-stops. Take 0.5 and raise it to the power of 1.5 (using the . button on a scientific calculator), which equals roughly 0.35355.

Nikon SB-910 Review - Ken Rockwell

File Type PDF Sb 900 Guide Number

The SB-910 is a high-end Speedlight for advanced amateur to professional photographers that offers a number of improvements over its predecessor, the Nikon Speedlight SB-900. Among these improvements are smoother operation, greater illumination precision, and the adoption of hard color filters.

Comparison: Nikon Speedlight SB-700 vs. Nikon Speedlight ...

The SB-910 is an update to the short-lived SB-900, and adds hard plastic color-correction filters to replace the wimpy gels of the SB-900. The SB-910's color correction filters are critical to get the color of the flash to match indoor lighting; without these filters, the flash light would look too blue indoors at home or in good restaurants, and too purple under fluorescent lights.
