While modern books are born digital, books old enough to be in the public domain may never have seen a computer. Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of mobile devices and eBook readers.

Control - A part of the experiment that is not being tested and is used for comparison. • Variable - Any part of an experiment that can change.

Bart Simpson Controls And Variables With Answers

It's important for a scientist to try to hold all variables constant except for the independent variable. If a control variable changes during an experiment, it may invalidate the correlation between the dependent and independent variable. When possible, control variables should be identified, measured, and recorded.

Identify the Controls and Variables - The Biology Corner

Controlled variables are quantities that a scientist wants to remain constant, and she or he must observe them as carefully as the dependent variables. For example, in the dog experiment example, you would need to control how hungry the dogs are at the start of the experiment, the type of food you are feeding them, and whether the food was a type that they liked.

Scientific Method Controls and Variables Part 2 Answer Key ...

Scientific Method - Controls and Variables * * Scientific Experiments Follow Rules. An experimenter changes one factor and observes or measures what happens. * The Control Variable The experimenter makes a special effort to keep other factors constant so that they will not effect the outcome. Those factors are called control variables.
