Selling Put Options: Tutorial - Examples

Selling those options without covering them – by either owning the shares or having enough equity in the account to cover it if the option landed ITM – would potentially be a recipe for disaster. In fact, many brokers will not allow their clients to sell options naked unless they have it covered by a sufficient amount of collateral.

How to Buy and Sell Options | Pocketsense

A stock option is a contract giving the buyer the right, but not the obligation, to purchase or sell an equity at a specified price on or before a certain date. An option that lets you buy a stock is known as a call option; one that lets you sell a stock is known as a put option. If you do not exercise your right under the contract before the expiration date, your option expires and you lose ...

Buying Options Vs Selling Options - Replete Equities

Buying a call option entitles the buyer of the option the right to purchase the underlying futures contract at the strike price any time before the contract expires. This rarely happens, and there is not much benefit to doing this, so don't get caught up in the formal definition of buying a call option.

Know the Right Time to Buy a Call Option

A naked call option is when an option seller sells a call option without owning the underlying stock. Naked short selling of options is considered very risky since there is no limit to how high a stock's price can go and the option seller is not "covered" against potential losses by owning the underlying stock.
