A social psychologist, Mann, taught a UCLA graduate seminar on the psychology of eating four years ago. She and her students continued the research when the course ended. Mann's co-authors are Erika Westling, Ann-Marie Lew, Barbra Samuels and Jason Chatman.

Dieting does not work, UCLA researchers report | UCLA

Weight loss surgery can have major, life-changing effects, especially for those with type 2 diabetes. Weight loss can not only help prevent the onset of diabetes, but it can even reverse the condition. About 84% of patients report remission of their diabetes after surgery. Other people typically need less medicine to control their condition.

Bariatric Surgery | ProMedica

The definition and classification of chronic kidney disease (CKD) have evolved over time, but current international guidelines define this condition as decreased kidney function shown by glomerular filtration rate (GFR) of less than 60 mL/min per 1.73 m², or markers of kidney damage, or both, of at least 3 months duration, regardless of the underlying cause.

Chronic Kidney Disease - The Lancet

415 million people live with diabetes worldwide, and an estimated 193 million people have undiagnosed diabetes. Type 2 diabetes accounts for more than 90% of patients with diabetes and leads to microvascular and macrovascular complications that cause profound psychological and physical distress to both patients and carers and put a huge burden on health-care systems.
