*Sensation Perception Wolfe Jeremy Kluender*

*A sense is a biological system used by an organism for sensation, the process of gathering information about the world and responding to stimuli. (For example, in the human body, the brain receives signals from the senses, which continuously receive information from the environment, interprets these signals, and causes the body to respond, either chemically or physically.)*

*Sense - Wikipedia*

*Perception (from the Latin perceptio, meaning gathering or receiving) is the organization, identification, and interpretation of sensory information in order to represent and understand the presented information or environment.. All perception involves signals that go through the nervous system, which in turn result from physical or chemical stimulation of the sensory system.*
