Signaling System # 7 PDF

Signaling System No. 7 is a set of telephony signaling protocols developed in 1975, which is used to set up and tear down telephone calls in most parts of the world-wide public switched telephone network. The protocol also performs number translation, local number portability, prepaid billing, Short Message Service, and other services. In North America SS7 is often referred to as Common Channel Signaling System 7. In the United Kingdom, it is called C7, number 7 and Common Channel Interoffice Si
