Hi Guys, Picked up a 2006 Skoda Fabia Classic 1.2 16v this morning for the misses. It is in good condition with 58K miles on the clock. Got it home and gave it a good scan on the ole VCDS Mostly looks good however got couple of errors one in ABS block which I don't seem to understand? I cleared the errors but the ABS issue returned. I looked up the info on Ross Tech but they make sense to me?
