However, Gut does not cover two essential topics for a graduate probability course. It is especially worrying that Brownian motion, the jewel of probability theory, is left out. In view of the centrality of Brownian motion in modern-day probability and analysis, and in view of the fact that Brownian motion is both a martingale and a Markov chain, it seems to me that one cannot skip this in a graduate course.

All homework assignments must be written by you, i.e. you cannot copy someone else's solution verbatim. However, I would very much encourage you to form study groups and do the homework together in small groups. Homework is the most important part of a graduate mathematics course, and I encourage you to take it very seriously.
