ANSWER. A solar eclipse occurs when the Sun, Earth, and Moon are in alignment and the Moon covers the Sun. There are different kinds of solar eclipses depending on how much of the Moon is blocked by the Sun. A partial eclipse covers a portion of the Sun, and a total eclipse covers all of the Sun's surface. What is a lunar eclipse?

In a hands-on way, students explore light's properties of absorption, reflection, transmission and refraction through various experimental stations within the classroom. To understand absorption, reflection and transmission, they shine flashlights on a number of provided objects. To understand refraction, students create indoor rainbows. An understanding of the fundamental properties of light ...

Inverse Square Law Formula Questions: 1) If a bright flashlight has a light intensity of 15.0 candela at a distance 1.00 m from the lens, what is the intensity of the flashlight 100.0 m from the lens?. Answer : The intensity at the farther distance can be found using the formula: If $d_1 = 1.00$ m from the lens, and $d_2 = 100.0$ m from the lens, then $I_1 = 15.0$ candela, and we need to solve for I_2 .

I enjoy contributing to other's education because it's honorable and a mutual benefit. I learned in high school that you learn 90% of what you teach and I've stood by that ever since. I first tutored 7th grade math as a senior in High School and I also tutored Physics 2 (Electricity and Magnetism) in College. After graduating, I substituted...

In the analytical technique of mass spectrometry, atoms or molecules are ionized using a high-energy electron beam and then separated based on their mass-to-charge ratios (m/z). The results are presented as a mass spectrum, which shows the relative abundances of the ions on the y-axis and their m/z ratios on the x-axis. This

Kill the messenger—that's the answer. It's so simple, so easy. It spares college leaders from addressing the deeper, more complex causes of poor performance (as picked up by the tests). They don't have to go back to scores on the NAEP exams in math in 4th grade and 8th grade, which show similar achievement gaps.
