Spread Betting | Spread Betting

Why do CFD and spread betting FX prices look different? You trade forex via CFD in contracts or lots. We therefore display CFD forex prices in the same way you would expect to see them on an FX exchange: e.g. 1.31425; Because you spread bet on forex in currency per point, we display prices differently e.g. 13142.5.

What is spread betting? Spread betting intro for Forex and ...

Both Forex trading and spread betting allow the trader to profit in any type of market, whether it is rising or falling. In the case of spread betting, a trader only predicts whether they think the market for their chosen asset will rise or fall, so it makes no difference what moves the market actually makes as long as their prediction turns out to be correct.
