SQL (Structured Query Language) is a special-purpose programming language designed for managing data held in a relational database management system (RDBMS), or for stream processing in a relational data stream management system (RDSMS).

What is PL/SQL

PL/SQL is a Procedural Language (PL) that extends the Structured Query Language (SQL). If you have been programming Pascal or Ada, you will find much familiar syntax in PL/SQL. It is difficult to write applications using SQL only because each SQL statement runs independently and has little or no effect on each other.
