1 ANSWER KEY: EXPERIMENT #5 PRE-LAB QUESTIONS: 1. (1 point) e.g. from MSDS's: Both acids and bases are potentially hazardous to your eyes. People react quicker to acid in the eyes due to the irritation with acids. Sodium hydroxide is probably more hazardous because of the tendency of bases to react with (solubilize) body tissue. Risk of permanent damage is greater with NaOH.

Sticky Tape Activity

After testing all of the shoes, it turned out that Connor's shoe had the most friction for all sides. We think the reason why Connor's shoe had the most friction because it was a skate shoe. For lot of grip so they do not slide off of the board. Michael's shoe (walking shoe) had the second most friction.
