Surface roughness, often shortened to roughness, is a component of surface texture. It is quantified by the deviations in the direction of

the normal vector of a real surface from its ideal form. If these deviations are large, the surface is rough; if they are small, the surface is smooth.

Surface roughness - Wikipedia

The RK aluminium profile system is identified by its unique connection technology which eliminates any drilling / machining of the aluminium profile. As well as the high strength of the profile connection it also reduces assembly work time significantly. more

Components for automation technology - RK Rose+Krieger

Cyclic guanosine monophosphate (cGMP) is a cyclic nucleotide derived from guanosine triphosphate (GTP). cGMP acts as a second messenger much like cyclic AMP. Its most likely mechanism of action is activation of intracellular protein kinases in response to the binding of membrane-impermeable peptide hormones to the external cell surface.

Cyclic guanosine monophosphate - Wikipedia
