of injury, implications for musculoskeletal dysfunction in the athlete, and treatment options for the clinician. The sural nerve, a sensory nerve, courses down the postural-lateral aspect of the calf. Its primary role is to innervate the skin over the distal...

## Access Free Sural Neurectomy

Sural neuritis (a.k.a. sural neuralgia) is pain that occurs due to irritation or injury of the sural nerve. The pain is typically described as a burning sensation located on the outside of the foot and ankle. It may occur following surgery of the foot and ankle or after a direct injury to the nerve itself. In many cases,
