International Engine Wiring Harness | Vander Haag's
International Bypass Harnesses. An International bypass harness is used to communicate with the ECM on or off the engine. Use this harness to run the engine in or out of the truck. The harness is used to bypass the vehicle wiring to the engine ECM. Click photo to view larger image

International T444E Ecm Parts | TPI
I have a 99 IH 4700 with a T444E engine. The engine always starts, however, it runs rough and has no power. I suspected a loose UVC wiring harness, but I think that is only part of the problem. I retrieved the codes from the ECM, and there is a long list of issues. The codes all relate to cyl. 2,4,6,8 as well thr accelerator pedal.
