WWII Myths - German tank strength in the Battle of France 1940

The Tiger had 100 mm of armor on the front of the hull and turret, while the sides had 80mm of armor. Armor was weakest on the rear of the turret. Americans and British tank forces first encountered the German Tiger I in North Africa, where it outclassed the British Churchills and American M4 Shermans .

*Type 3 Chi-Nu Medium Tank - Imperial Japan Against Allied tanks equipped with guns of 37mm caliber and over they were cannon fodder. The German victory was not due to a numerical or qualitative superiority in armored vehicles. Instead it had to do with the way they used their armored forces, grouping them together, supporting them with ample airpower and providing them with dedicated infantry, anti-tank, artillery and communication units.*
