...

Nut galls contain about 60–77% tannic acid. Tannic acid is light-yellowish colored amorphous powder having a strong astringent taste. It becomes yellowish when exposed to light. It is soluble in six parts of cold water and more freely in hot water. The aqueous solution of tannic acid gradually decomposes on standing by fermentation.

Tannic Acid: Uses, Side Effects, Interactions, Dosage, and ...
General description Tannic acid (TA) is a natural, non-toxic organic acid with corrosion inhibitive property for metals and alloys. A chemiluminescence (CL) system of KIO₄ (potassium periodate)–H₂O₂ (hydrogen peroxide)–Tween40 has been employed in the detection of tannic acid in industrial wastewater. Tannic acid hydrolyzes to form mainly glucose and gallic acid.
