How to Choose Binoculars | REI Expert Advice

The guide scope is typically mounted on top of, or beside, the main imaging telescope. Most guide scopes are small, high-powered refractors because they don't add much weight to the setup and do offer the image detail needed

to see the star drift.

***Telescope - Guide Extension
Catheters | Medtronic
Binoculars for backpacking
and hiking: Because size and
weight in a pack are key
concerns, you'll want compact
binoculars with magnification
of 8 or 10 and an objective
lens diameter less than about
28 (8x25, 10x25, 8x28 and
10x28 are all fine choices). A
pair with a rubber coating will
be more durable, and models
that are water resistant or
waterproof will help with
exposure to the elements.***
