50 ExErcisE 5 Anatomy of the cell and cell Division Iodine stain or methylene blue stain Compound microscope Procedures 1. Review the nonmembranous and membranous organelles in Figure 5.1. 2. Identify each organelle on a cell model. 3. Prepare a wet-mount slide from cells of the inner lining of your cheek. a. Place a drop of saline on a microscope slide. b.

Mitosis: Splitting Up is Complicated - Crash Course Biology #12

Chapter Review. The life of cell consists of stages that make up the cell cycle. After a cell is born, it passes through an interphase before it is ready to replicate itself and produce daughter cells. This interphase includes two gap phases (G 1 and G 2), as well as an S phase, during which its DNA is replicated in preparation for cell division. The cell cycle is under precise regulation by chemical messengers both inside and outside the cell that provide "stop" and "go" signals for ...
