The future of work—the good, the challenging & the unknown ...

Future of Work Disruption lies ahead. Driven by accelerating connectivity, new talent models, and cognitive tools, work is changing. As robotics, AI, the gig economy and crowds grow, jobs are being redefined, creating the “augmented workforce.” We must reconsider how jobs are designed and work to adapt and learn for future growth.

Homepage - MIT Work of the Future

Though the future of work will always be in the future, the future of your work has never been closer. The rise of robots, machine intelligence, distributed ledgers, quantum physics, “gig” labor, the death of privacy, a world eaten alive by software—all these trends point to a new world that’s shaping up quite differently from anything we’ve ever seen, or worked in, before.
