The Game of Logic is a book written by Lewis Carroll, published in 1886. In addition to his well-known children's literature, Carroll was an academic mathematician who worked in mathematical logic. This Game requires nine Counters--four of one colour and five of another: say four red and five grey.

The Project Gutenberg E-text of The Game of Logic, by ...

Especially his diagram method I find particularly illustrative and worth of today's classroom. Also very enlightening is his side-by-side comparison of his method and those of Euclid and Venn. The second book, "The Game of Logic", is a literal board game based on syllogisms based on his method. Very little archaisms get in the way, here.
