In order to get the right connection information, a special header Forward has been standardized to include the right information. However this standard is not very old, so many proxies out there have been using other headers that usually start with the prefix: X-Forward.Vert.x web allows the usage and parsing of these headers but not by default.

### **The Mime Order**

MIME-Version - Indicates the message is MIME-formatted.

## Read Book The Mime Order

Content-Type - Indicates the media type of the message or a part of the message, represented by a type and subtype. It also includes a boundary field which specifies a string as the MIME boundary or as the encapsulation boundary, depending on the location of Content-Type.

RFC 2045 Internet Message Bodies November 1996 2.5.Body Part  
The term "body part" refers to an entity inside of a multipart entity.  
2.6.Body The term "body", when not further qualified, means the  
body of an entity, that is, the body of either a message or of a body  
part. NOTE: The previous four definitions are clearly circular. This  
is unavoidable, since the overall structure of a MIME message ...

### **mod\_mime - Apache HTTP Server Version 2.4**

For images, MIME types come back like the following: image/jpeg  
image/png... Caveat: The MIME type is detected from the file  
extension and can be fooled or spoofed. One can rename a .jpg to a  
.png and the MIME type will be reported as image/png.
