included angle of the vectors as in Fig. 8.34.. Their scalar product or dot product is denoted by and is defined as a scalar $| \cdot | \cdot | \cos \theta$. Thus $\theta = \arccos \left(\frac{| \cdot |}{| | | |} \right)$.. Since the resultant of θ is a scalar, it is called scalar product. Further we use the symbol dot ('.') and hence another name dot product.
