Yet in The Science of Interstellar, Kip Thorne, the physicist who assisted Nolan on the scientific aspects of Interstellar, shows us that the movie's jaw-dropping events and stunning, never-before-attempted visuals are grounded in real science.

Download The Science of Interstellar Pdf Ebook

Kip Stephen Thorne (born June 1, 1940) is an American theoretical physicist and Nobel laureate, known for his contributions in gravitational physics and astrophysics. A longtime friend and colleague of Stephen Hawking and Carl Sagan, he was the Feynman Professor of Theoretical Physics at the California Institute of Technology (Caltech) until 2009 and is one of the world's leading experts on the ...

Parsing the Science of Interstellar with Physicist Kip ...

The film " Interstellar " relies on real science for many of its stunning visuals. Physicist Kip Thorne, an expert on black holes and wormholes, provided the math that the special effects artists...

The Science of Interstellar - Kip Thorne - Google Books

— Kip S. Thorne, The Science of Interstellar "The first planet that Cooper and his crew visit is Miller's. The most impressive things about this planet are the extreme slowing of time there, gigantic water waves, and huge tidal gravity. All three are related, and arise from the planet's closeness to Gargantua."

The Science of Interstellar by Kip S. Thorne - Goodreads

Kip Thorne is the Feynman Professor of Theoretical Physics Emeritus at Caltech, an executive producer for Interstellar, and the author of the bestselling Black Holes and Time Warps and other books. He lives in

Pasadena, California.
