of the needed speed and altitude are provided by something other than rockets, or by other than expendable rockets. A number of alternatives to expendable rockets have been proposed. In some systems such as a combination launch system, skyhook, rocket sled launch, rockoon, or air launch, a rocket would be part ...

The Grateful Brain | Psychology Today

Excitation block . The FitzHugh-Nagumo model explains the excitation block phenomenon, i.e., the cessation of repetitive spiking as the amplitude of the stimulus current increases. When I is weak or zero, the equilibrium (intersection of nullclines) is on the left (stable) branch of V -nullcline, and the model is resting. Increasing I shifts the nullcline upward and the equilibrium ...
