The Wedge

Gap wedge: So-named because it falls in-between the pitching wedge and sand wedge in loft. The gap wedge has more loft than a PW, less loft than a SW.; Lob wedge: Usually the highest-lofted club a golfer will carry. The lob wedge creates a very steep angle of ascent and descent, for shots that must get up very quickly (perhaps, for example, to get over a tree) and for shots that you want to hit ...

Home | The Wedge Group

A wedge is a triangular shaped tool, and is a portable inclined plane, and one of the six classical simple machines. It can be used to separate two objects or portions of an object, lift up an object, or hold an object in place. It functions by converting a force applied to its blunt end into forces perpendicular to its inclined surfaces.
