SOLVED: 99 ford explorer 4.0 pushrod motor torque spec on ...

No. You should tighten the bolts or screws in a part to about half of the torque spec first. For example, if the final torque should be 100 foot-pounds, then tighten to 50 foot-pounds first, and then repeat the process until you've tightened to 100 foot-pounds. This is called torque-to-yield, where you tighten a bolt to a certain point and then
