How the engine cooling system works - DAKS TOYOTA

"Burping" the cooling system in your Toyota refers to bleeding the  
cooling system and is necessary if air has entered the system. Air in  
the cooling system causes hot spots and subsequently overheating and  
serious engine damage. To prevent serious engine damage, take a few  
minutes to bleed the cooling system of air. Bleeding the cooling  
system in your Toyota is very simple and best of all doesn't require  
any tools.

Toyota 2y Engine Cooling System

The cooling system in your Toyota Tacoma is an integral part that  
keeps it operating efficiently. If there are leaks that go unchecked,  
this can cause the cooling system to malfunction and thereby damage  
the engine. Checking for these leaks is relatively easy and anyone can  
perform this important task.
