## **Warning Lights**

The check engine and VSC (Vehicle Stability Control) lights came on in traffic and the computer set a P0442 code (small leak in EVAP system).

Apparently this is very common code on older Toyota vehicles, and it seems to be the default code anytime there's vacuum or fuel vapor

Check Engine  
leak in the intake, fuel,  
and or EVAP system.

## **Toyota Highlander Vsc Check Engine**

Yes they are related,  
usually the VSC  
(vehicle skid control )  
warning light will turn  
on when the check  
engine light turns on,  
this is so because the  
VSC is disabled as soon

read, I am leaning  
Check Engine  
towards the O2 sensor  
as being the problem.

## **How to Reset a VSC Light on a Highlander | It Still Runs**

Most Toyota owners will find that when the Check Engine and VSC lights are lit, there is a problem with an O2 Sensor or gas cap. Try tightening or replacing
