GOBI Library Solutions from EBSCO provides print books, e-books and collection development services to academic and research libraries worldwide.

Transition To Advanced Mathematics Solution
Given a sorted array containing only numbers 0 and 1, the task is to find the transition point efficiently. The transition point is the point where "0" ends and "1" begins.
Naive Approach: Traverse the array and print the index of the first 1. Traverse the array from the start to the end of ...

TIMSS and PIRLS are international assessments
that monitor trends in student achievement in
mathematics, science, and reading. Currently
70 countries participate in the assessments,
which have been conducted at regular
intervals since 1995.

Solution (a) There are two Na^+ ions, so the coordination sphere has a negative two charge: $[\text{PtCl}_6]^{2-}$. There are six anionic chloride ligands, so $2 = 6 + x$, and the oxidation state of the platinum is $4+$. The name of the complex is sodium hexachloroplatinate(IV), and the coordination number is six.
