Financial results aren't something I typically focus on, but here we had what seemed like yet another ALD player that I wasn't familiar with. So I thought I'd check them out too. Turns out they play a very different game from the one we've been looking at. They don't do ALD for semiconductors; they focus on nanoparticles and polymers.

NASA Mars Rover Team - Dr. Raina Gough has been selected to be part of a team of 28 scientists to work on NASA's Curiosity Rover in Mars. Her laboratory studies on deliquescence, the process where a crystalline salt picks up atmospheric water and turn into a solution, has shown that briny solutions can be stable and possibly exist for certain times on the surface of Mars.
