communication in fiber | Science ...

The scientists discovered that rather than compressing gas, as traditional refrigerators do, a more efficient method could be to twist rubber fibers.

Untwisting the wires produced a more effective cooling method and didn't release greenhouse gases like traditional refrigerators.

FIBER-LINE® Twisting: Twist, Ply, & Cords | FIBER-LINE®
Fiber twist is a factor only in cut pile carpets. Looped styles (Berbers) are not gauged by twist because the yarns are looped back into the carpet. Most residential cut pile carpets have a twist number of between 3 and 6, while some friezes have up to 8 turns per inch.

Effect of Twist on Yarn and

Fabric Properties

Low twist yarns are weaker, softer, lightweight, less abrasive resistant, flexible, have more loft, and pill. High twist yarns are stronger, harder, heavier, more abrasive resistant, less flexible, cooler. For example: woolen yarns - made from all lengths of the fiber (carded wool) is usually spun in a low twist yarn.

Twist of the Fibers by D.K. Holmberg, Paperback | Barnes

...

Twist is mainly the spiral arrangement of the fibers around the axis of the yarn. In textile industry, the

Characteristics of Fiber | World In A Spin

If twist direction is in a clockwise then they are Linen, Ramie, and Nettle. If twist direction is in anti-clockwise then it is Hemp and most of the fibers show the same twist direction. If twist direction is in alternating clockwise and anti-clockwise then it is Cotton fiber. So, after observing the result we can give the identity of the fiber.
