Cut two matching pieces of hardboard to make the formwork for building the arches of the barrel. Screw three or four pieces of equal length timber between the two pieces of hardboard to set them about 150 to 200 mm apart. At this point it would be a good idea to drill two finger holes in one of the boards to facilitate removal of the formwork.

History. The bridge was the last of the three suspension spans built across the lower East River, following the Brooklyn and Williamsburg Bridges.In the earliest plans it was to have been called "Bridge No. 3", but was given the name Manhattan Bridge in 1902. When the name was confirmed in 1904, The New York Times criticized it as "meaningless", lobbied for one after Brooklyn's Wallabout Bay ...
