Lab Report: Types of Reactions. Record your observations on these data pages as you perform each reaction. Write a balanced formula equation with state labels for each reaction. If no reaction occurs, follow the instructions in the Procedure. Part A: Combination Reactions.

Chemical Reactions Labs Answer Key - BetterLesson

Introduction: The purpose of the lab was to create a demonstration that presented four types of chemical reactions (synthesis, decomposition, single-displacement, and double-displacement). Each type of chemical reaction has different properties and have different indicators that a reaction has occurred.
